

# Conference Press Release

LoCloud invites you to share in the results achieved by the project and look to the future at our conference to be held in Amersfoort, Netherlands on 5th February 2016.

LoCloud is a Best Practice Network of 32 partners from 26 European countries, co-funded under the CIP ICT-PSP Programme of the European Commission and is dedicated to providing Local Content in an Europeana Cloud. The event will provide an opportunity to share, discuss and demonstrate tools, services and content in the context of Europeana.

The conference will present examples of some of the 4 million content items added to Europeana by our content partners, small and medium sized cultural heritage institutions from across Europe.

There will be presentations by the LoCloud group of technical partners who, along with network and regional aggregation service providers, have been involved in developing Cloud based tools and services to assist cultural heritage institutions in adding their content to Europeana.

At the end of the day we will showcase the recent LoCloud “My local heritage” competition and present awards to the winners.

The event hosted by cultural Agency of the Netherlands and organised in co-operation with the National Archives of Norway is free to attend but places are limited, so please book early.

Come and join us and explore how you could benefit from the tools and services developed by the LoCloud project and start to add your cultural heritage content to the cloud.
